Backlog Recovery

Epics: Identity, Catalog, Purchasing

Story 1: User Login

As a Customer,

I can log in to the application using my username and password,

So that I can access restricted features like purchasing items.

* **Code Evidence:** `routes/login.js` → `router.post('/login/auth', ...)`

* **Supporting Logic:** `model/auth.js` → `do_auth()` executes the SQL lookup.

Story 2: User Logout

As a Logged-in Customer,

I can log out of my session,

So that my account remains secure on shared devices.

* **Code Evidence:** `routes/login.js` → `router.get('/logout', ...)`

Story 3: Browse Product Catalog

As a Customer,

I can view a list of all available products,

So that I can see what is for sale.

* **Code Evidence:** `routes/products.js` → `router.get('/', ...)`

* **Supporting Logic:** `model/products.js` → `list_products()`

Story 4: View Product Details

As a Customer,

I can click on a specific product to see its details,

So that I can make an informed buying decision.

* **Code Evidence:** `routes/products.js` → `router.get('/products/detail', ...)`

* **Supporting Logic:** `model/products.js` → `getProduct(product_id)`

Story 5: Search Products

As a Customer,

I can search for products by name or description,

So that I can find specific items quickly.

* **Code Evidence:** `routes/products.js` → `router.get('/products/search', ...)`

* **Supporting Logic:** `model/products.js` → `search(query)`

Story 6: Purchase Product

As a Logged-in Customer,

I can submit a purchase form with my shipping details,

So that I can order an item.

* **Code Evidence:** `routes/products.js` → `router.all('/products/buy', ...)` (Note: Handles both GET and POST, likely legacy behavior).

* **Supporting Logic:** `model/products.js` → `purchase(cart)`

Story 7: View Purchase History

As a Logged-in Customer,

I can view a list of products I have previously bought,

So that I can track my orders.

* **Code Evidence:** `routes/products.js` → `router.get('/products/purchased', ...)`

* **Supporting Logic:** `model/products.js` → `get_purchased(username)`
